CONTROLLERS

4500 SERIES CONTROLLER

NANODAC SERIES CONTROLLER

CULTURE TESTS CHAMBERS AND REFRIGERATED INCUBATORS

- Temperature range from +10° to +60° (from +4°C to -10°C optionally).
- Adjustable humidity range from 20% to 95% R.H.
- Graphical control panel with 4.3" touchscreen (7.0" TFT optionally).
- Electronic data recorder with graphical data representation and USB output for data download.
- Temperature and/or humidity control.
- Probe with 0,1°C precision.
- Control and programming of system parameters through PID microprocessor.
- Height-adjustable lights on the shelves and/or the top and/or the sides.
- Lighting control with 6 levels of intensity, with the possibility to simulate the sunrise/sunset.
- Horizontal or semi-horizontal airflow, to reduce stress on animals.
- Maximum light intensity in PPFD 200 $\mu\text{mol m}^{-2} \text{s}^{-1}$.
- Optional regulation of the airflow speed, to reduce stress on plants.
- Optionally LED or fluorescent lights.
- Humidification system through ultrasounds (electrodes or vaporizers optionally).
- Product protection through safety thermostat for maximum/minimum temperature.
- Possibility of disinfection by means of hydrogen peroxide (in models with optional stainless steel in the interior chamber) or germicidal.
- UVC light evaporator coated with epoxy, very resistant to acids.

PRODUCTS AND APPLICATIONS

- Moth growth chambers
- Genomics testing chambers
- Growth and incubation of invertebrates
- Drosophila and insects research incubators
- Small animal rearing
- Small mammals small mammals (mice and rats)
- Visitable plant growth chambers
- Refrigerated incubators
- Breeding and weaning research chambers
- Fish propagation

TYPICAL APPLICATIONS

Controlled animal rearing conditions: temperature and humidity with photoperiods.

Light intensity:

PPFD 2 to 200 $\mu\text{mol m}^{-2} \text{s}^{-1}$ 50 to 10.000 Lux

Selection of wavelengths:

Available spectrums: from 240 to 730 nm, depending on the required wavelength.

Airflow:

Airflow speed between 0.2 and 0.5 m/s, to ensure optimal temperature uniformity through growing area, reducing the surface stress of the animals.

LABORATORY CHAMBERS FOR CLIMATE TESTS AT CONSTANT TEMPERATURE AND HUMIDITY (EGCHSDPH, EGCHSDPH/HR, EGCVSDPH AND EGCVSDPH/HR MODELS)

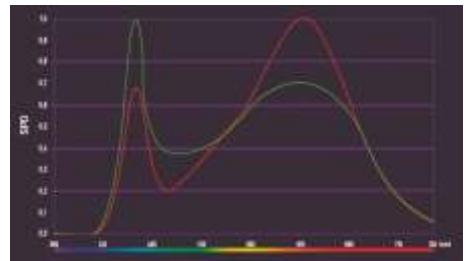

- Incorporate 4100 to 4500 controllers with graphical data representation.
- 4,3" or 7,0" backlit TFT touchscreen (depending on the model), for temperature and/or humidity control. Includes graphical representation of the temperature and/or humidity curve.
- +/-0,1°C on-screen precision.
- +/-1,0°C to 1,5°C homogeneity inside of the chamber at 37°C (depending on the model).
- +/-0,50°C to 1,0°C stability inside of the chamber at 37°C (depending on the model).
- Cooling system controlled by electrovalves.
- Safety thermostat to protect samples against high/low temperatures.
- Microprocessor to control temperature parameters through a Pt100 or capacitive probe (depending on the model), with +/- 0,1°C precision.
- Humidity control: between 20% and 90% RH (+/- 3% RH), in a temperature range between +20°C and +40°C in EGCHSDPH/HR and EGCVSDPH/HR models (depending on the model).
- Other temperature ranges are eligible.
- Capacitive electronic probe (4-20mA) with a +/-0,75% RH precision (optional 0,5% RH).
- Humidity generator by ultrasound, introducing microscopic water drops at room temperature inside of the chamber (electrodes, resistors or spray nozzles optionally).
- Drying system by condensation through refrigerating evaporator.
- Optional venting port.
- CO₂ measuring system (optional).
- Light intensity from 2 µmol m⁻² s⁻¹ 50 lux PPFD to 200 µmol m⁻² s⁻¹ 10.000 lux PPFD, **(depending on the configuration).
- Measuring system of accumulated radiation intensity with radiation sensor (optional).
- Adjustable airflow speed, to ensure optimal temperature uniformity through the growing area and to reduce surface stress of the animal.

TECHNICAL SPECIFICATIONS

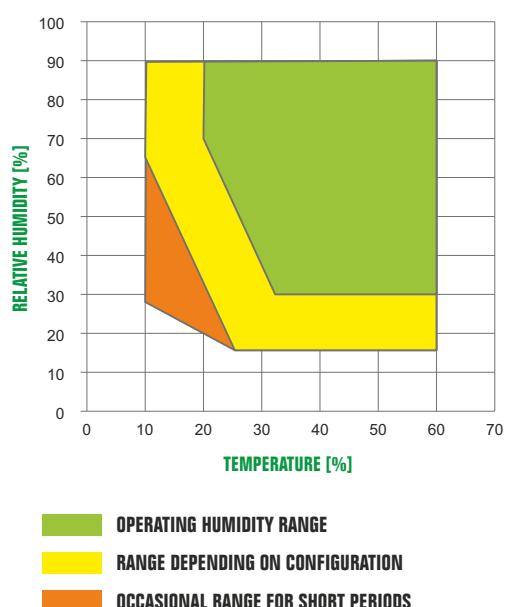

- Internal door with thermal safety glass, with hermetic seal.
- Solid opaque external door, heated to avoid condensations in the internal glass door, self-closing and large handle.
- Microprocessor to control parameters with PID system.
- Audible and visible independent alarms for maximum and minimum temperatures, with backup battery, with more than 48h duration (72h optional).
- System settings protected by numerical password.
- Controller with records and graphical representation of maximum and minimum temperatures
- Optional: external door with heated double glass and large handle.
- Forced air cooling, horizontal or vertical airflow, and evenly distributed, with high homogeneity of the temperature inside of the chamber.
- 50 mm high density polyurethane insulation (CFC and HCFC free).
- CFC and HCFC free, biodegradable cooling gas.
- Hermetic compressor, built over dampers to reduce noise levels.
- Independent cooling and heating systems.
- AISI 304 stainless steel internal finish (AISI 316 optionally).
- Rounded corners for easy cleaning.
- Perforated stainless steel shelves, with adjustable height.
- Heated door frame to ensure an ice-free closure, in models up to -10°C.
- Magnetic seal in the external door to ensure hermetic closure of both the external and internal door.
- Door lock.
- Wall port hole to introduce wires and external instruments.
- Epoxy coated external steel finish.
- Stainless steel legs with adjustable height.
- 4 wheeled base to facilitate movement, with height-adjustable legs.
- Working in areas with temperatures up to +32°C.

Horizontal airflow

High efficiency LED spectrum

Optional:
LED lights on the door,
rear side and sides

OPTIONAL ACCESSORIES FOR EGCHSDPH, EGCHSDPH/HR, EGCVSDPH AND EGCVSDPH/HR

- Aeration systems.
- Aeration port, for the passing of fresh air; manual or controlled depending on the CO₂ concentration.
- CO₂ measurement system.
- CO₂ introduction system in the chamber with control valves.
- Measuring system of the accumulated radiation intensity.
- Safety thermostat, protects samples from high or low temperatures.
- Humidity generator up to +95% RH.
- Air drying system up to 15% RH at +4°C.
- Independent alarms, audible and visual for maximum and minimum temperatures with backup battery, with more than 48h of duration (72h optional).
- Circular temperature recorder 7 days, powered by backup batteries.
- USB output for system data storage.
- RS 485/232 connexion for remote control.
- PC Software (on demand).
- Potential free exit for remote alarm control.
- Programmable test periods through digital controller.
- Germicidal light tubes or sterilization type UVA, UVB or UVC.
- Internal power sockets in the chamber.
- Telescopic trays, for instrument placement.
- Wall bypass for the introduction of wires and external instruments (schackers, chromatographs, etc).
- External door with heated glass and heated frame in models with humidity control or low temperature.
- Stainless steel exterior.
- AISI 316 stainless steel interior or exterior.
- Optional models focused on ICH stability tests.

Series 4500 controller for models finished in "5"

- 4.3" TFT Touchscreen (7.0" optional) with graphical measurement data representation.
- GSM phone alarm module (optional).
- RS 485 connexion for remote control (optional).
- Ethernet output to monitor data by cable (MODBUS TCP/ICP) or by a wireless module, including specific software for visualization and control of the data (optional).
- Backup battery duration longer than 24 hours (48/72 hours optional)

OPTIONAL ACCESSORIES

See page 25

with LED light in the
frontal door
and 4500 controller

TECHNICAL SPECIFICATIONS

- Vertical airflow cooling system.
- PID Microprocessor, controls all parameter.
- Temperature range from +10°C to +50°C.
- Digital controller with LED screen, indicates temperature and parameters.
- Optionally in ERIS/EGBO models: 4.3" TFT touchscreen with graphic representations of the temperature and/or humidity curve.
- +/-0.1°C on-screen precision.
- +/-1.5°C homogeneity inside of the chamber at 37°C (depending on the model).
- +/-0.85°C stability on the chamber's inside at 37°C (depending on the model).
- Pt 100 or NTC (depending on the model) probe for temperature control.
- Safety lock in door with keys.
- Main switch (on/off) protected with key.
- Hermetic compressor, installed built over dampers to reduce noise levels.
- Using low GWP refrigerant, depending on the application.
- Electrovalve cooling system.
- ABS (thermoformed polypropylene) interior finish in one piece, very resistent.
- Epoxy coated external steel finish.
- Models with blind door (glass door optionally).
- Internal sockets to connect instruments on the chamber's inside (optional).
- Internal illumination with photoperiod: optional, LED or fluorescent lightning.
- Light intensity from 120 $\mu\text{mol m}^{-2} \text{s}^{-1}$ 6.000 lux PPFD to 220 $\mu\text{mol m}^{-2} \text{s}^{-1}$ 12.000 lux PPFD**.
- Factory open on the right or left (specify when ordering).
- Legs adjustable on height.
- 50 mm isolation on injected polyurethane of high density.
- Using low GWP refrigerant, depending on the application, CFC and HCFC free.
- Working in areas with temperatures up to +32°C.

// ERISDPH/EGBO 344 HR FL
with 4000 controller

// ERIDPH/EGBO 180 DBO LED with 2000 controller

IN ERISDPH/EGBO/HR MODELS

- Humidity control: working temperature range from 20% up to 80% RH (+/-3% RH), in a temperature range from +20°C to +40°C.
- Electronic humidity probe (4-20 mA), with a +/-3% precision.
- Humidity generator by centrifugation or ultrasound.
- Introduction of microscopic water drops at ambient temperature into the chamber.
- Condensation drying system, cooling vaporize.

OPTIONAL ACCESSORIES

See page 25

LED DETAILS

See page 27

NANODAC series controller

- 3.5" TFT Touchscreen with graphical measurement data representation.
- GSM phone alarm module (optional).
- RS 485 connexion for remote control (optional).
- Ethernet output to monitor data by cable (MODBUS TCP/ICP) or by a wireless module, including specific software for visualization and control of the data (optional).
- Backup battery duration longer than 24 hours (48/72 hours optional).

TECHNICAL SPECIFICATIONS

- Specially covered for corrosion protection.
- Vertical forced airflow cooling system.
- PID Microprocessor to control parameters.
- Temperature range from +10°C to +55°C.
- Safety thermostat for product protection.
- Audible, visible and independent alarms for maximal and minimal temperatures.
- Backlighted LED screen for temperature and parameters control.
- +/-0.1°C on-screen precision.
- +/-1.0 to 1.5°C homogeneity inside of the chamber at 37°C (depending on the model).
- +/-0.8 to 1.0°C stability inside of the chamber at 37°C (depending on the model).
- Pt 100 probe, for temperature control.
- Optional: internal door.
- Blind external door with opening up to 180°, opening on the right (opening on the left is optional).
- Optional: main switch (on/off) protected with key.
- Touchscreen control panel.
- Internal illumination with photoperiod: optional, LED or fluorescent lightning.
- Light intensity 60 µmol m⁻² s⁻¹ 3.000 lux PPFD to 180 µmol m⁻² s⁻¹ 9.000 lux PPFD (according to the configuration).
- Optional: temperature/time ramps programming, with record of different work cycles.
- Alarm stop switch, it rearms when programmed temperature is reached.
- Possibility of disinfection by means of hydrogen peroxide (in models with optional stainless steel in the interior chamber) or germicidal UVC light.
- Evaporator specially coated with Epoxy, very resistant to acids.
- Wall port hole for wires and probes access, for external/internal instrument connexion.
- Finned heating element, improves the temperature's distribution.
- Independent heating and cooling systems.
- Forced air venting, with vertical airflow, evenly distributed, allowing more homogeneity of the air's temperature inside the chamber.
- Using low GWP refrigerant, depending on the application CFC and HCFC free, biodegradable cooling gas.
- Hermetic compressor, installed on the dampers to reduce noise levels.
- Steel exterior finish covered in epoxy or stainless steel (depending on the model).
- Interior finish: steel covered in epoxy or stainless steel, optional.
- Rounded corners to facilitate cleaning.
- Magnetic all-round seal allowing a perfect closure of the door.
- High density injected polyurethane isolation, CFC and HCFC free.
- Height-adjustable legs, optional wheels.
- Working in areas with temperatures up to +32°C.

ROOMS GATEWAYS

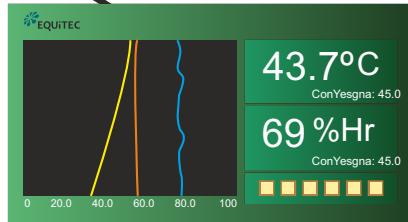

WAKL-IN VISITABLE MODULAR INSECTS AND ENTHOMOLOGY CHAMBERS DPH

 **UNIFLOW**

- Optional temperature from +10°C to +50°C with lights off or on. Other temperatures on demand.
- Programmable temperature day/night.
- Humidity control: work optional range from 20% to 95% RH (+/-3%), in a temperature range from +15°C to +40°C.
- Graphic control panel with 4.3" or 7.0" TFT touchscreen.
- Electronic data recorder with graphical data representation and USB output for data download.
- Temperature and/or humidity control.
- Light intensity control, day/night photoperiod.
- 0.1°C precision probe.
- From +/-0.1°C to +27°C and from +/-0.5°C to +40°C homogeneity in the chamber (depending on the model).
- From +/-0.1°C to +27°C and from +/-0.5°C to +40°C stability in the chamber (depending on the model).
- Microprocessor for parameter control and programming with PID system.
- Humidification system by ultrasound, optionally electrodes or spray nozzles.
- Lights on shelves, on the ceiling or sides are height-adjustable.
- Light control with 6 intensity levels, allows sunrise/sunset simulation or free intensity control from 10 to 100% with LED lights.
- Horizontal or semi-horizontal flow, reduces stress on plants.
- Maximum intensity on trays from 200 µmol m⁻² s⁻¹ 10.000 lux PPFD to 2000 µmol m⁻² s⁻¹ 108.000 lux PPFD**.

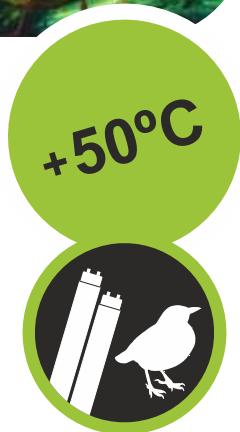

4500 SERIES CONTROLLER

OPTIONAL

- Day lights tubes for algae growth.
- Growth tubes for plant growth on trays or ceiling.
- Tubes with different LED diodes configurations; for different types of plants growth and vegetative cycles, depending on the application.
- Lights on the ceiling, sides and rear side of the chamber, with thermal protection glass windows.
- Digital printer for temperature and/or humidity control.
- Remote control alarm exit (4-20 mA).
- RS 485 control connexion interface + communication protocols.
- Additional access ports for wires and tubes.
- Internal sockets.
- Accumulated radiation intensity measurement system.
- GSM phone alarm module.
- UV light tubes for sterilization.
- Data recorder.
- Wi-Fi module with Ethernet connexion + web visualization.
- 72 hours battery, safety backup for power failure situations.
- USB output for stored data download.
- Communication software with PC, on demand.
- CO₂ measurement system through infrared cells or thermal sensor.
- Irrigation systems.
- Cooling output, to allow the passing of fresh air; manual or regulated depending on the CO₂ concentration.
- CO₂ introduction system in the chamber with control valves.

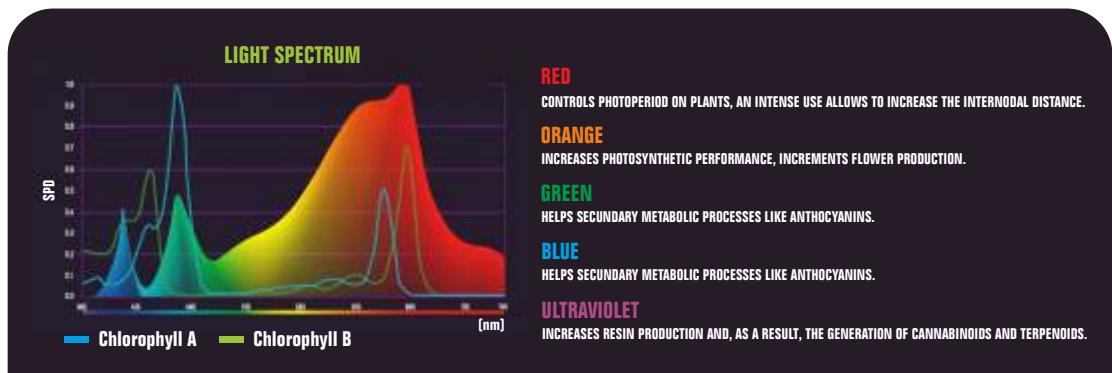

LED LIGHTS APPLICATIONS AND PERFORMANCE FOR INVERTREBRATES CHAMBERS

CUSTOM SPECTRA

We have a wide selection of wavelenghts for photo-biological research, for example UV-A 390 nm, 530 nm greens. Likewise, we have specific spectrum for use in specific applications, for example a better production of secondary metabolites, including rising and better production or an improvement of the specific metabolites. Amber lighting is used where photosensitive processes are being used. This special amber light, or 570nm, is used in applications where photochemically sensitive materials are being used or manufactured to prevent inadvertent exposure to damaging UV and blue light. A perfect application for Amber LED lighting is semiconductor manufacturing.

- Common applications: growth conditions of controlled plants:** temperature and humidity with photoperiods.
- Light intensity in common applications:** 2 to 2000 $\mu\text{mol m}^{-2}/\text{s}^{-1}$.
- Available spectra:** 360 to 730 nm, depending on the required luminaire.

	S 60	M 90	L 120	XL 150
CONSUMPTION	25 W	40 W	50 W	80 W
DIMENSION (MM) [LENGHT/DIAMETER]	595 / Ø 26	895 / Ø 26	1.198 / Ø 26	1.498 / Ø 26
DIMENSION (INCHES) [LENGHT/DIAMETER]	23.4" / Ø 1.02"	35.2" / Ø 1.02"	47.2" / Ø 1.02"	59.0" / Ø 1.02"
CERTIFICATES	Marked CE			
SPECTRUM	Depending on the necessity: adjustable espectrum and intensity			
PPDF INTENSITY	from 2 $\mu\text{mol m}^{-2}/\text{s}^{-1}$ to 200 $\mu\text{mol m}^{-2}/\text{s}^{-1}$			
DISTANCE TO THE PLANT	100 to 1.000 mm			
DECAY OF LIGHT INTENSITY	Max. 10% at 35.000 h in standard applications 50.000 h			
LIGHT EFFICIENCY (380-820 NM)	Up to 2,2 $\mu\text{mol}/\text{W}$ [depending on the spectrum]			
AMBIENT WORK TEMPERATURE	0/+50°C (32-100° F)			

Available with transparent or diffusive cover, G13 connecting elad, IP20 and IP64 degree of protection with Valoya socket set, according to ROHS, limited 5 years warranty.

LED LIGHT TUBES ON THE FLUORESCENT TUBE RACKS

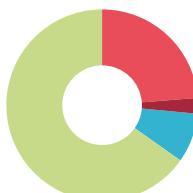

Type T6 or T8 tubes allows series of tubes to be installed in the fluorescent tube racks without any modification (magnetic ballast fixing).

Profitable, very easy to install in terminals with IP64 for particular tests, for example.

Note: It is possible that some products have changed since the printing date of this catalog. The printing date was June 10, 2022. The manufacturer is authorized to make changes in the design, color and shape between the date of the order and the date of printing.

Even so, these changes will not affect the main specifications of the units. If the seller or the owner uses symbols or numbers to name the products, you can not extract rights from them. Photographs and drawings may show accessories and instruments not included in the standard models. Colors can change in relation to photographs by the printing process. The catalog may contain products that can not be sent to certain countries due to national or international legislation. The information shown on laws, legal protocols and legal requirements is valid only in Spain.
